

O V E R V I E W

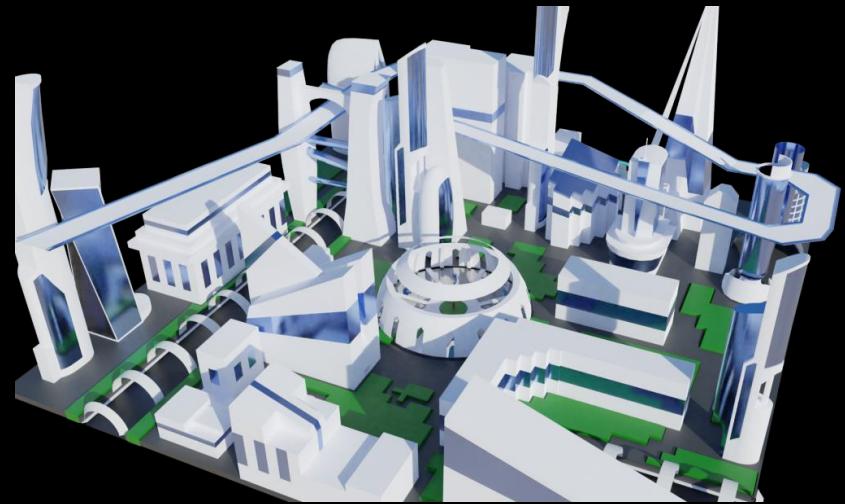

## The center of the metaverse.

Gamiум uses blockchain technology and token standards to create the first metaverse that interconnects all of them, making avatars and assets multi-metaverse compatible. Create your avatar, exchange NFTs, get a job, socialize, and earn in the Gamiум world.

## The first decentralized social metaverse.

Unlocking the full potential of the metaverse step by step.  
We combine current social network features with a 3D  
fully immersive Gamiум world, built on Unreal Engine.

\* Blocking of The Bridge  
already built on Unreal  
Engine.

## A quasi real experience.

We are building a quasi-realistic 3D environment using Unreal Engine. We are also building AI-based avatars and pets, for a more complete and immersive experience.

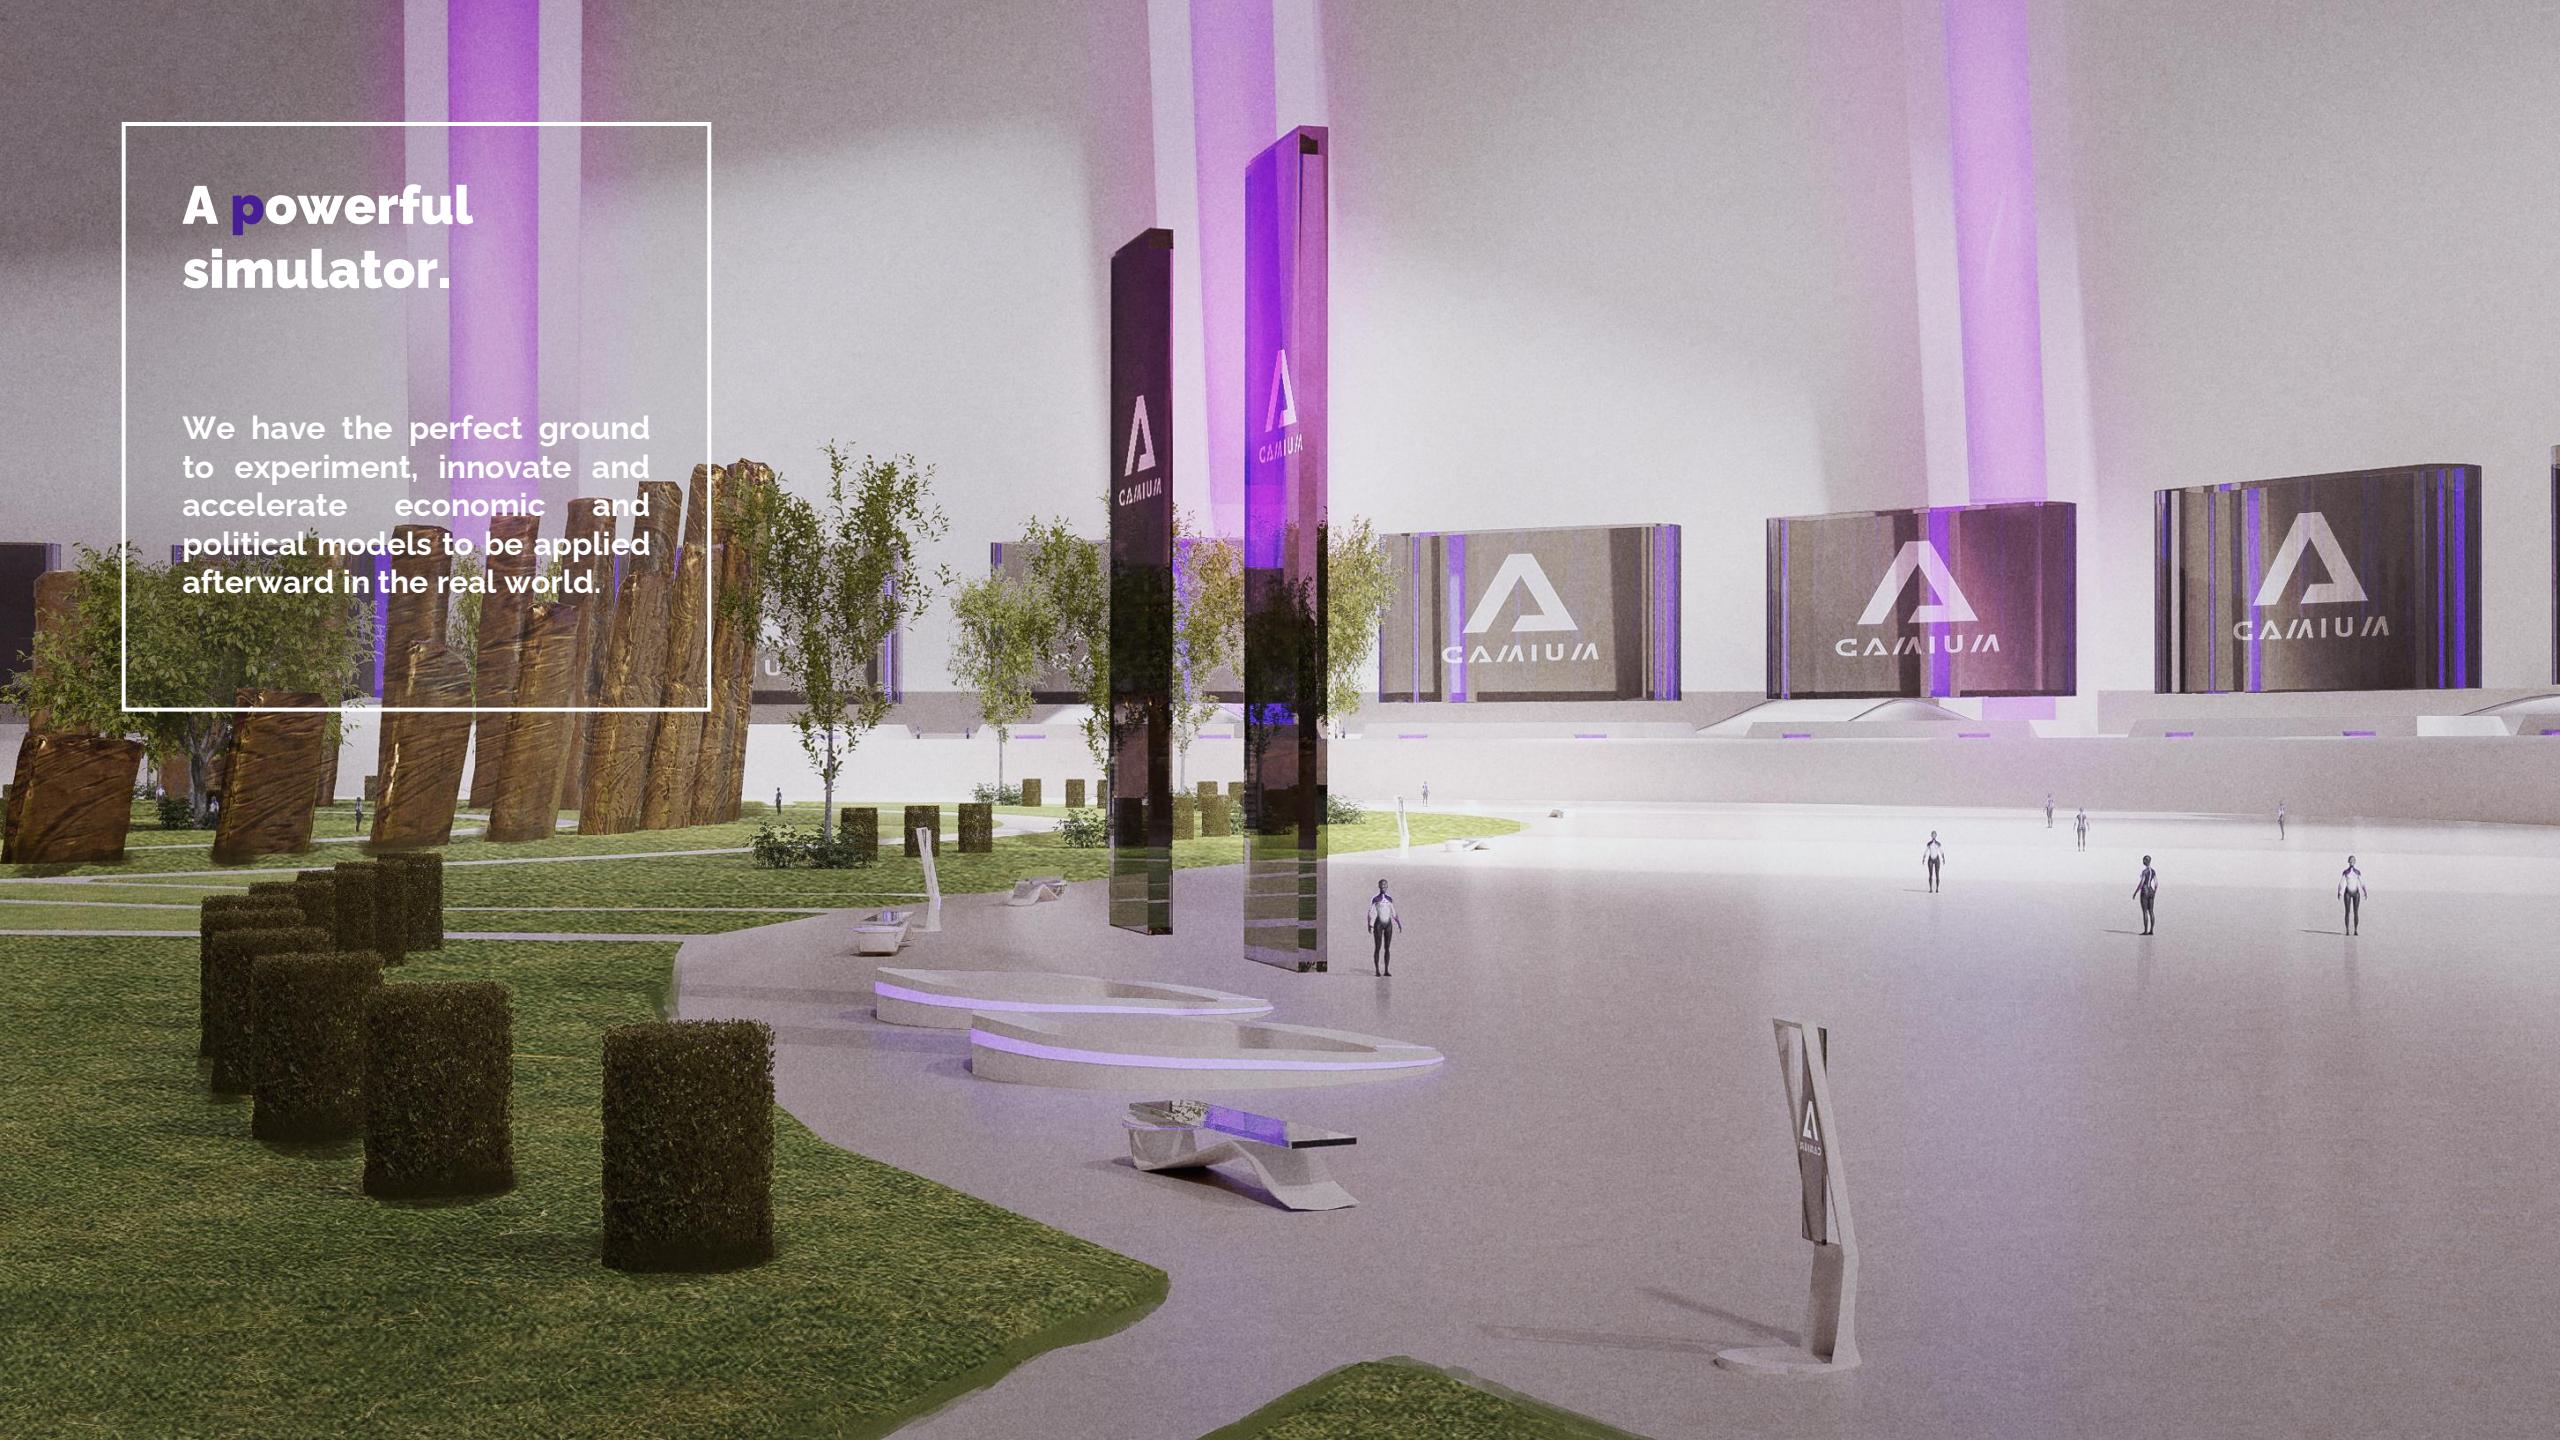

## Powering the NFT's

We are creating an environment where NFTs have real value. You can build your house with NFTs objects, access exclusive events only if you own a specific NFT.

## A powerful simulator.

We have the perfect ground to experiment, innovate and accelerate economic and political models to be applied afterward in the real world.

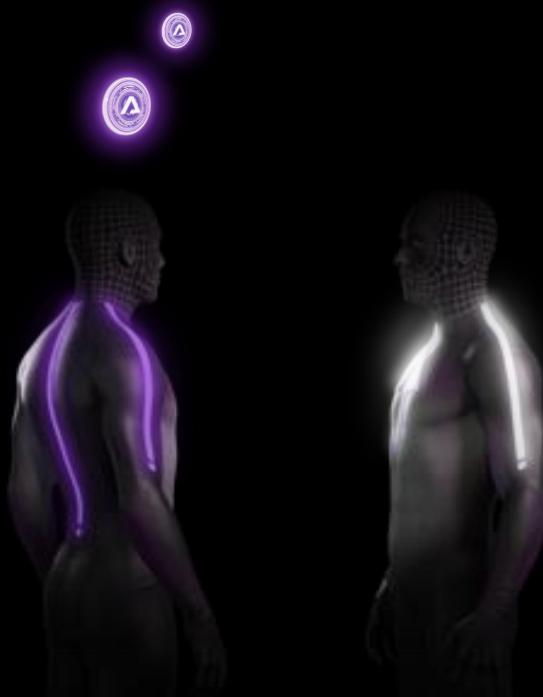

## The avatar: build your digital identity.

Humans will be represented by avatars in the metaverse. Our avatar is the only digital identity portable, persistent, non-corruptible, and verifiable using digital signatures and blockchain technology. Link assets and trusted blockchain data to your avatar and expand the possibilities of the metaverse.

### Enjoy multiple built-in social features.

Garium will release multiple social features for their avatars such as applications, jobs, a marketplace, DeFi, and many more. You can get a job in the metaverse depending on your avatar's social data.

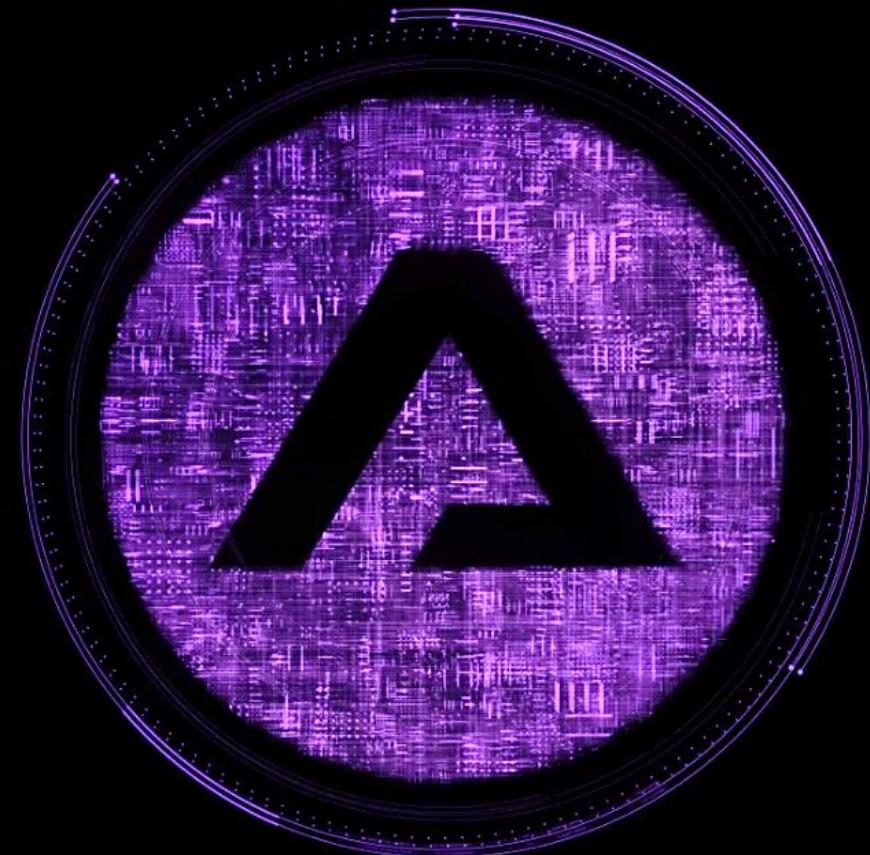

## **Socialize to earn: rewards for socializing.**

Gamium is the pioneer of the economic model 'Socialize to Earn', where avatars are rewarded for socializing. Monetize all your social interactions in a fully gamified space.

## Garium's economy: \$GMM and \$MST.

Garium's economy is empowered by two tokens, \$GMM and \$MST\$: \$GMM is the Garium governance and medium of exchange token, while \$MST is our utility and reward token in the heart of the Garium economy.

## The Gamium 3 key innovating features.

### The first digital identity

Creating the first digital identity relying on public and verifiable data from blockchains.

### Decentralized social metaverse

Building the first decentralized social metaverse, powering NFTs, DAOs, and DeFi.

### Rewards for socializing

Socialize to earn: the first monetization model that rewards users for their social interactions.

**The metaverse will be a multi-trillion market in the coming years.**

- Avatar sales
- Direct NFTs sales
- Land sales
- Sales of AI objects, like pets
- Fee for indirect NFT sales on our marketplace
- Fee for DeFi transactions
- Fee for each job created in Gamium
- Fee for company sales on our metaverse
- Advertising on our metaverse
- Providing structured data to other metaverses
- Many more we will figure out along the way

# ROADMAP

## Q3 2021

Idea conceptualization  
Talent acquisition  
Marketing Strategy

## Q4 2021

Early Supporters  
3D Art development  
Website  
Whitepaper  
Smart contracts development  
Smart contracts audit  
Avatar blockchain data scraping  
2D development start  
3D development start on Unreal Engine  
GMM private sale  
GMM public presale  
GMM public listing

## Q1 2022

Avatar NFT Generation Event  
Metaverse interoperability integration  
AI on avatar blockchain data  
GMM airdrop  
Avatar customization  
MST tokenomics and launch

# ROADMAP

20-25

## Q2 2022

- NFT marketplace
- Social features integration
- Socialize to Earn integration
- GMM staking
- DeFi integration

## Q3 2022

- IMO integration
- Gamification integration and testing
- SDK for building
- Beta release

## Q4 2022

- Public release
- Games implementation

## Q1 2023

- More metaverse integrations
